

## Unfortunate devastating fire accident

This devastating fire accident occurred on the premises of the new office extension block on September 11<sup>th</sup> (12:30 AM) near the Infinity Corridor.

Owing to the negligence of the office staffs, this unfortunate accident was bound to occur. The metered box of the power security room had been showing constant fluctuations over the past few days. The officer-in-charge was lazy enough not to inform it to the respective electrical authorities which led to this event. Two poor security guards were injured in the same who just arrived at that place half an hour earlier.

For preventing such events in the future, staffs and managers-in-charge should get rid of their neglecting behaviour, be more cautious and fire extinguisher alarms & bottles must be installed at the office building which will help reduce such events in the future.
